

Russell Dudek

TECHNOLOGY INNOVATION LEADER - AI-ENABLED OPERATIONS

Pittsburgh, Pennsylvania
Candidate Vision Site

Operator-technologist who connects emerging technology to operating reality through problem framing, decision mechanisms, governance, adoption, telemetry, and measurable outcomes. Experience spans AI-first transformation, scaled 24/7 operations, high-reliability engineering, regulated autonomy, and cross-functional technical leadership.

ROLE-ALIGNED CAPABILITIES

AI opportunity framing & readiness	GenAI & agentic workflow design	POC-to-operations transition
Cross-functional technical leadership	Human-in-the-loop governance	Evaluation & decision mechanisms
Data & telemetry workflows	Operating metrics & escalation	Adoption, standard work & learning

SELECTED EXPERIENCE

Vape-Jet - Director of Operations2025-Present

- Lead AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connect factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, standard work, training, and accountability in a robotics and machine-vision environment with approximately 1,000 fielded robots.

DudeWorth - Founder / AI and Automation Advisor2017-Present

- Develop AI-readiness and opportunity frameworks spanning value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Design agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, evaluation, and governance rails.

Amazon - Operations Management / Site Leader2014-2018

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work, and operating mechanisms; contributed Prime Air research and Amazon Flex geolocation concepts.

Compunetics - Director, Operations and Engineering Management2000-2013

- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, root-cause practices, performance measures, and process controls; collaborated with DoD, CERN, Intel, and AMD.

ROLE MANDATE TRANSLATION

PROVE THE WORK Frame the workflow and business outcome, define evidence before build, stress realistic conditions, and force an explicit scale, partner, reuse, or stop decision.	OPERATE THE SYSTEM Bring scaled operating mechanisms, high-reliability controls, and current AI-first transformation experience to the experiment-to-scale boundary.	MAKE ADOPTION REAL Connect human authority, standard work, training, escalation, telemetry, cost visibility, and accountability so capability becomes trusted work.
---	--	---

EVIDENCE BOUNDARY This resume does not claim a five-year foundation-model research career or unverified production ownership of Azure AI Foundry or Vertex AI.

EXPERIMENT-TO-SCALE OPERATING MODEL

FRAME Work + outcome	BOUND Authority + risk	BUILD Minimum proof	STRESS Quality + economics	COMPOUND Scale + reuse
--------------------------------	----------------------------------	-------------------------------	--------------------------------------	----------------------------------

CANDIDATE THESIS Innovation compounds when every experiment leaves behind a reusable capability, reusable evidence, or a fast no.

Russell Dudek

TECHNICAL DEPTH - REGULATED AUTONOMY - DISTRIBUTED OPERATIONS
COMPLEMENTARY EXPERIENCE

Pittsburgh, Pennsylvania
Candidate Vision Site

ZeusVu - Chief Pilot, Autonomous Systems and Aerial Data

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision field intelligence; designed medical drone delivery and chain-of-custody concepts.

Cardinal Building Products - Regional Director

- Built the company's first remote regional operation and modernized customer, CRM, fulfillment, logistics, digital marketing, SEO, and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

Enviro Social Capital - Chairman of the Board

- Co-founded and led a public-private impact initiative focused on sustainable infrastructure, green finance, and civic transformation.
- Helped shape and evaluate a \$200 million Social Impact Bond feasibility concept for Pittsburgh green-infrastructure improvement.

IEEE - CMPT and EDS Pittsburgh Chapter Chair

- Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing, and emerging technology.
- Organized conferences, seminars, business tours, and technical programming.

EDUCATION

University of Pittsburgh
Bachelor of Science
Academic grounding includes materials science, physical chemistry, and biology-related studies.

CREDENTIALS

IBM Enterprise Design Thinking Practitioner
Six Sigma Certification
OSHA 10

TECHNICAL TOOLKIT

Agentic AI - LLM workflows - RAG patterns -
Human-in-the-loop design - Python - SQL -
JavaScript - TensorFlow - Tableau - ERP/Odoo -
Jira - Confluence - HubSpot - Slack - GIS

LEADERSHIP THROUGH-LINE

Frames problems, aligns stakeholders, creates visibility, sets decision mechanisms, and makes change executable.

EVIDENCE INTEGRITY

Direct evidence is strongest in AI-enabled operating transformation, agentic workflow design, technical program leadership, regulated autonomous systems, and high-reliability engineering. Platform-specific Azure AI Foundry or Vertex AI production ownership is not claimed.

KPMG ROLE FIT - HOW I WOULD OPERATE

FRAME ENTERPRISE WORK

Anchor the experiment in a real workflow, decision, user, baseline, consequence, and accountable sponsor.

BUILD DECISION EVIDENCE

Define human authority, representative tests, edge cases, quality thresholds, economics, and adoption signals before scale.

COMPOUND THE LEARNING

Preserve reusable services, controls, evaluation assets, lessons, ownership, and explicit stop decisions for the next team.

CANDIDATE THESIS

Innovation compounds when every experiment leaves behind a reusable capability, reusable evidence, or a fast no.
