

Operator-technologist who makes complex work visible, connects technical and business teams, and builds operating mechanisms that turn emerging technology into adopted, measurable outcomes. Experience spans AI-first operating transformation, agentic workflow design, scaled 24/7 operations, high-reliability engineering, regulated autonomous systems, and cross-functional technical leadership.

ROLE-ALIGNED CAPABILITIES

AI opportunity framing & readiness	GenAI & agentic workflow design	POC-to-operations transition
Cross-functional technical leadership	Human-in-the-loop governance	Evaluation & decision mechanisms
Data & telemetry workflows	Operating metrics & escalation	Adoption, standard work & learning

SELECTED EXPERIENCE

Vape-Jet | Director of Operations

2025-Present

- Lead AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connect factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Operate in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

DudeWorth | Founder / AI and Automation Advisor

2017-Present

- Develop AI-readiness and opportunity frameworks assessing value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Design agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation, and governance rails.
- Advise on AI-enabled operations, logistics technology, warehouse automation, AMRs, ASRS, cobots, transportation systems, network analysis, and workflow design.

Amazon | Operations Management / Site Leader

2014-2018

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward operating environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work, and operating mechanisms; applied Lean and Gemba across safety, quality, throughput, customer experience, and engagement.
- Contributed to logistics innovation through Prime Air research and Amazon Flex geolocation concepts.

Compunetics | Director of Operations and Engineering Management

2000-2013

- Progressed through R&D program management, production management, strategic acquisition, operations management, and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, root-cause practices, performance measures, and process controls; collaborated with DoD, CERN, Intel, and AMD.

ROLE MANDATE TRANSLATION

Prove the work Frame the workflow and business outcome, define evidence before build, stress the proof under realistic conditions, and force an explicit scale, partner, reuse, or stop decision.	Operate the system Bring scaled 24/7 operating mechanisms, high-reliability engineering controls, and current AI-first transformation experience to the experiment-to-scale boundary.	Make adoption real Connect human authority, standard work, training, escalation, telemetry, cost visibility, and accountability so technical capability becomes trusted work.
---	---	---

EVIDENCE BOUNDARY

This resume does not claim a five-year foundation-model research career or unverified production ownership of Azure AI Foundry or Vertex AI. The case is grounded in verified adjacent evidence and direct operating leadership.

Russell Dudek

TECHNICAL DEPTH | REGULATED AUTONOMY | DISTRIBUTED OPERATIONS | EMERGING TECHNOLOGY

COMPLEMENTARY EXPERIENCE

ZeusVu | Chief Pilot, Autonomous Systems and Aerial Data Operations 2018-2022

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.
- Designed medical drone delivery and chain-of-custody concepts connecting technology, risk, stakeholders, and governed execution.

Cardinal Building Products | Regional Director 2021-2023

- Built the company's first remote regional operation.
- Modernized distributed customer, CRM, commercial, fulfillment, logistics, digital marketing, SEO, and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

Enviro Social Capital | Chairman of the Board 2014-2017

- Co-founded and led a public-private impact initiative focused on sustainable infrastructure, green finance, and civic transformation.
- Helped shape and evaluate a \$200 million Social Impact Bond feasibility concept for Pittsburgh sewage and green-infrastructure improvement.

IEEE | CMPT and EDS Pittsburgh Chapter Chair 2012-2016

- Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing, and emerging technology.
- Organized conferences, seminars, business tours, and technical programming.

EDUCATION

University of Pittsburgh Bachelor of Science

Academic grounding includes materials science, physical chemistry, and biology-related studies.

CREDENTIALS

IBM Enterprise Design Thinking Practitioner
Six Sigma Certification
OSHA 10

TECHNICAL TOOLKIT

Agentic AI | LLM workflows | RAG patterns | Human-in-the-loop design | Python | SQL | JavaScript | TensorFlow | Tableau | ERP/Odoo | Jira | Confluence | HubSpot | Slack | GIS and mapping workflows

LEADERSHIP THROUGH-LINE

Repeatedly works at the boundary between technical possibility and operating reality: framing problems, aligning stakeholders, creating visibility, setting decision mechanisms, and making change executable.

EVIDENCE INTEGRITY

Direct evidence is strongest in AI-enabled operating transformation, agentic workflow design, technical program leadership, regulated autonomous systems, and high-reliability engineering. Platform-specific production ownership in Azure AI Foundry or Vertex AI is not claimed.
